6 Earnings per unit ("EPU") and distribution per unit ("DPU") for the period

The EPU is computed using total return after tax and minority interest over the weighted average number of units for the period. The diluted EPU is the same as the basic EPU as there are no dilutive instruments in issue during the period.

In computing the DPU per unit, the number of units in issue as at the end of the period is used.

Review of performance for the quarter

Gross rental revenue was 0.7% above forecast due to contributions from properties acquired during the quarter, offset by a lower recovery of service charge income due to a tenant paying for the recoverable property expenses directly to the service providers.

The lower recovery of service charge income has a corresponding effect on the property operating expenses, which is 12.2% lower than forecast.

Non-property expenses increased by 78.2%, as follows:

- Increase in management fees which is in line with higher value of deposited properties with the addition of new properties not included in the forecast;
- Borrowing costs being S\$0.2 million above forecast due mainly to the use of bank borrowings to fund the acquisition of the four new properties;
- Net foreign exchange loss of S\$408,000 which relates to loss on translation of amount due from subsidiary at exchange rate as at 31 December 2007 and is offset in part by the net gain in revaluation of financial derivatives; and
- Increase in other trust expenses is mainly due to cost incurred by Japan Industrial Property Pte Ltd in relation to its incorporation and its acquisition of the property in Japan.

Overall, DPU per unit has increased from 1.86 cents to 1.92 cents, which is higher than forecast by 3.2%.

10 Commentary on the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months

Economic growth in the Asia Pacific remained strong in the second half of 2007. However, we expect that overall growth in the region will moderate as a result of the recent turbulence in the global financial markets and uncertainties surrounding the global economic outlook. The Asian Development Bank, in its Regional Economic Outlook for emerging East Asia¹ forecasts that the region will grow by 8.0% in 2008², down from 8.5% forecast in 2007.

The Singapore economy registered moderate growth in 4Q07. Advance estimates³ by the Ministry of Trade and Industry (MTI) in January showed that real gross domestic product (GDP) rose by 6.0% on a year-on-year basis in the fourth quarter, following a 9.0% gain in the previous quarter. For the year as a whole, the Singapore economy is estimated to have expanded by 7.5%, compared with 7.9% in 2006.

2007 was a year of growth for the industrial property market in Singapore⁴: Some key highlights include:

- Average monthly rent for hi-tech space rose 7.8% quarter-on-quarter and 37.5% year-on-year to \$2.75 per square foot by end-2007.
- The average occupancy rate for hi-tech space was 91.1% at end-2006 and rose to 92.8% at end-2007. At the same time, the average occupancy rate for business parks grew 5.0 percentage points year-on-year to an estimated 89.0% at end-2007.
- Rents for factories rose \$0.05 per square foot every quarter for the entire 2007.
- The average capital value for warehouses rose by about 10.0% during 2007.
- The occupancy rate for warehouses exceeded the 90.0% level for the first time in 3QFY07.

Ministry of Trade and Industry, "Advance GDP Estimates for Fourth Quarter 2007", 2 January 2008.

According to MTI, the advance GDP estimates for fourth quarter 2007 are computed largely from the first two months of the quarter (i.e. October and November 2007). They are intended as an early indication of the GDP growth in the quarter, and are subject to revision when more comprehensive data becomes available.

Outlook

The Manager believes that the outlook for the industrial property sector in 2008 for most Asian countries is positive, despite the current negativity in the global markets. This view is supported by the expected continued strength in industrial production throughout the region, particularly in China and India which are forecast to generate GDP growth for this year of 10.0% and 8.0% respectively.

As part of its active risk management strategy, the Manager will continue to focus on actively managing MI-REIT's capital structure and optimizing yield from its existing portfolio.
